EDUCATION

Missouri University of Science and Technology

B.S. in Computer Science

May 2027

GPA: 4.0/4.0

Courses: Deep Learning, Math of Machine Learning, Data Structures, Algorithms, Databases, Linear Algebra

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript, TypeScript, HTML, CSS, Java, Lua

Tools: Git, Docker, PostgreSQL, Snyk, Postman, E2B, BetterAuth, Clerk, Unity, Varjo Aero, OpenBCI Galea

Libraries: React.js, Next.js, Express, FastAPI, Flask, Turborepo, Tauri, PyTorch, TensorFlow, Pandas, Langchain, Prisma, Groq, ElevenLabs

Certifications: NVIDIA Fundamentals of Deep Learning

EXPERIENCE

Backend Developer Intern

Oct. 2025 – Present

Pledged

Remote

- Automated **OpenAPI to Postman conversion** for **330+ endpoints**, saving **2-3 hours per API update** across team
- Added **GitHub integration** to automatically update Postman configs whenever OpenAPI spec changes
- Resolved **2 critical and 5 high-severity vulnerabilities** using Snyk, hardening application security posture

Machine Learning Intern

Jun. 2025 – Aug. 2025

VisualEz

Gurugram, Haryana

- Engineered **AI floor tile matching system** achieving **85% accuracy** across **3,000+ tile variants** with 3-5 sec retrieval
- Architected **deep learning pipeline** with segmentation, shadow removal, and **$\Delta E2000$ color-distance matching**
- Deployed model handling real-world lighting variations to enable precise texture and pattern matching

Development Lead

Aug. 2024 – Present

Pickhacks Development Team

Rolla, MO

- Architected **end-to-end registration system** with BetterAuth, QR check-in, and email verification
- Built admin portal for organizers to manage participants and track real-time attendance across multiple stations

Backend Intern

Feb. 2025 – Apr. 2025

Finz

Remote

- Developed **RESTful APIs** for AI agent delivering real-time financial insights with **PyTorch forecasting models**
- Built **Pandas preprocessing pipelines** to clean and structure financial datasets for cashflow prediction

AI/ML Bootcamp Organizer

Jun. 2024 – Aug. 2024

IEEE Summer Camp

Saint Louis, MO

- Designed and delivered **AI/ML curriculum** on Neural Networks, Transformers, and LLMs for 30+ participants
- Led hands-on workshops in **TensorFlow, Matplotlib, NumPy** and mentored capstone LLM project

PROJECTS

Synaptically | Unity, Groq, ElevenLabs, OpenBCI Galea, Varjo Aero | 1st Place Meta & OpenBCI Tracks

Jan. 2025

- Built **VR + biometric training platform** using **OpenBCI Galea** (EEG, heart rate) to dynamically adjust AI NPC difficulty in social scenarios
- Integrated **Groq LLM** and **ElevenLabs TTS** for responsive conversational AI in public speaking and dating simulations
- Developed **Unity VR environment** with **Varjo Aero** integration for high-fidelity immersive experiences

PomoPatch | FastAPI, React, PostgreSQL, Tauri, Clerk | 1st Place Overall @ HackWashU

Jan. 2025

- Architected **FastAPI backend** and **PostgreSQL schema** for productivity game with plant growth, economy, and leaderboards
- Implemented **Turborepo monorepo** with React frontend, **Tauri desktop app**, deployed to Vercel and Railway
- Designed gamification mechanics rewarding 25-min Pomodoro sessions with coins for virtual plant purchases and upgrades

AnyGraph | React, Express, E2B, Gemini API, Turborepo

Apr. 2025 – Present

- Developed **AI-powered data visualization platform** with **Gemini API** for natural language graph generation from datasets
- Built **Turborepo monorepo** with **Express backend**, **React frontend**, and **E2B sandboxed code execution**
- Deployed full-stack application to **Render** (backend) and **Vercel** (frontend) with Kaggle dataset integration

ACTIVITIES AND HONORS

- USACO Silver, 2× ACSL Finalist (1st Place in State), Global Seal of Bilingualism in Spanish
